SHEARER DRUMS | CUTTING HEADS

COALTEC is a developer and supplier of tools for the mining industry. With many years of experience, we have attained high productivity through the use of highly reinforced materials in our manufacturing processes, thereby reducing downtime. Our tools have consistently proven their reliability in the production of coal, coke, potash, gypsum, basalt and others materials.

**SHEARER DRUMS**

Shearer loader	Dimensions	Shank cutter type	Production in tons
UKD 200-500	1000x800	BETEK BHR250 BHF33	510000
MB410	1030x800	BETEK BHF33	420000
MB470	1400x710	BETEK BHR213	950000

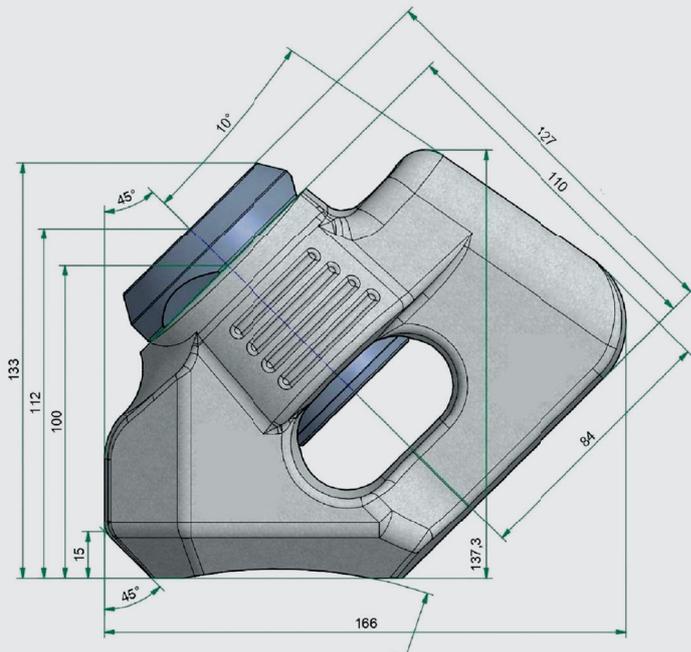

COALTEC manufactures shearer drums from 800 mm to 3000 mm, using only certified materials approved for mining applications to ensure top-level performance and safety. In close cooperation with our customers, we can produce the drums in your preferred color and offer optional protective coatings for enhanced durability.

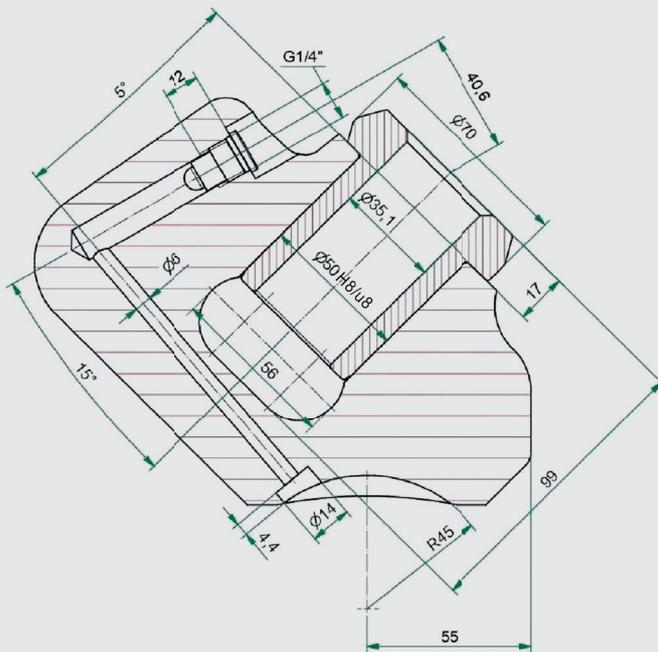

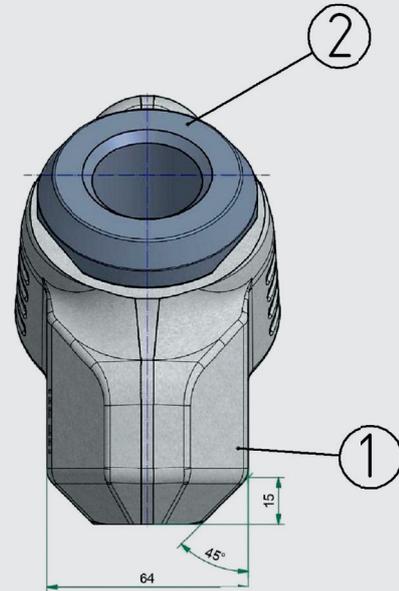

## **CUTTING HEADS**

COALTEC also manufactures high-performance cutting heads, delivering solutions for every type of tunneling machine. Designed for the world's toughest conditions, our products are proven to be reliable, robust and long-lasting.
